Null Pointer Book Service

Scenario

Users intermittently receive a `NullPointerException` when they call `getBookById()`.
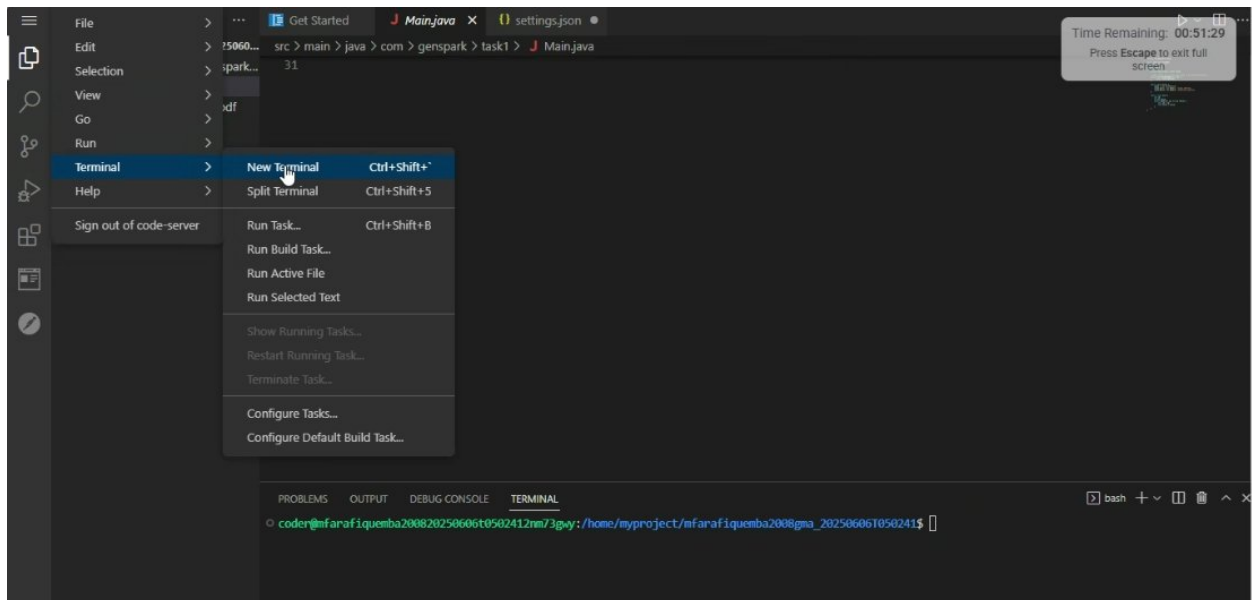

Objective

Locate and fix the root cause (a `NullPointerException`).

Acceptance

* Method must return valid book data Object.

* No unchecked exceptions should appear in logs.

Steps to Reproduce

Screenshot to launch terminal to run commands:

1. Compile with `mvn clean package`.

2. Run unit tests to observe failure using 'mvn test'

3. Final objective is to make test case pass.

4. You can run test cases many times and refactor your code.

Points to remember

1. Do not modify the method signatures in Main class
